

What do you hope to get from the event?

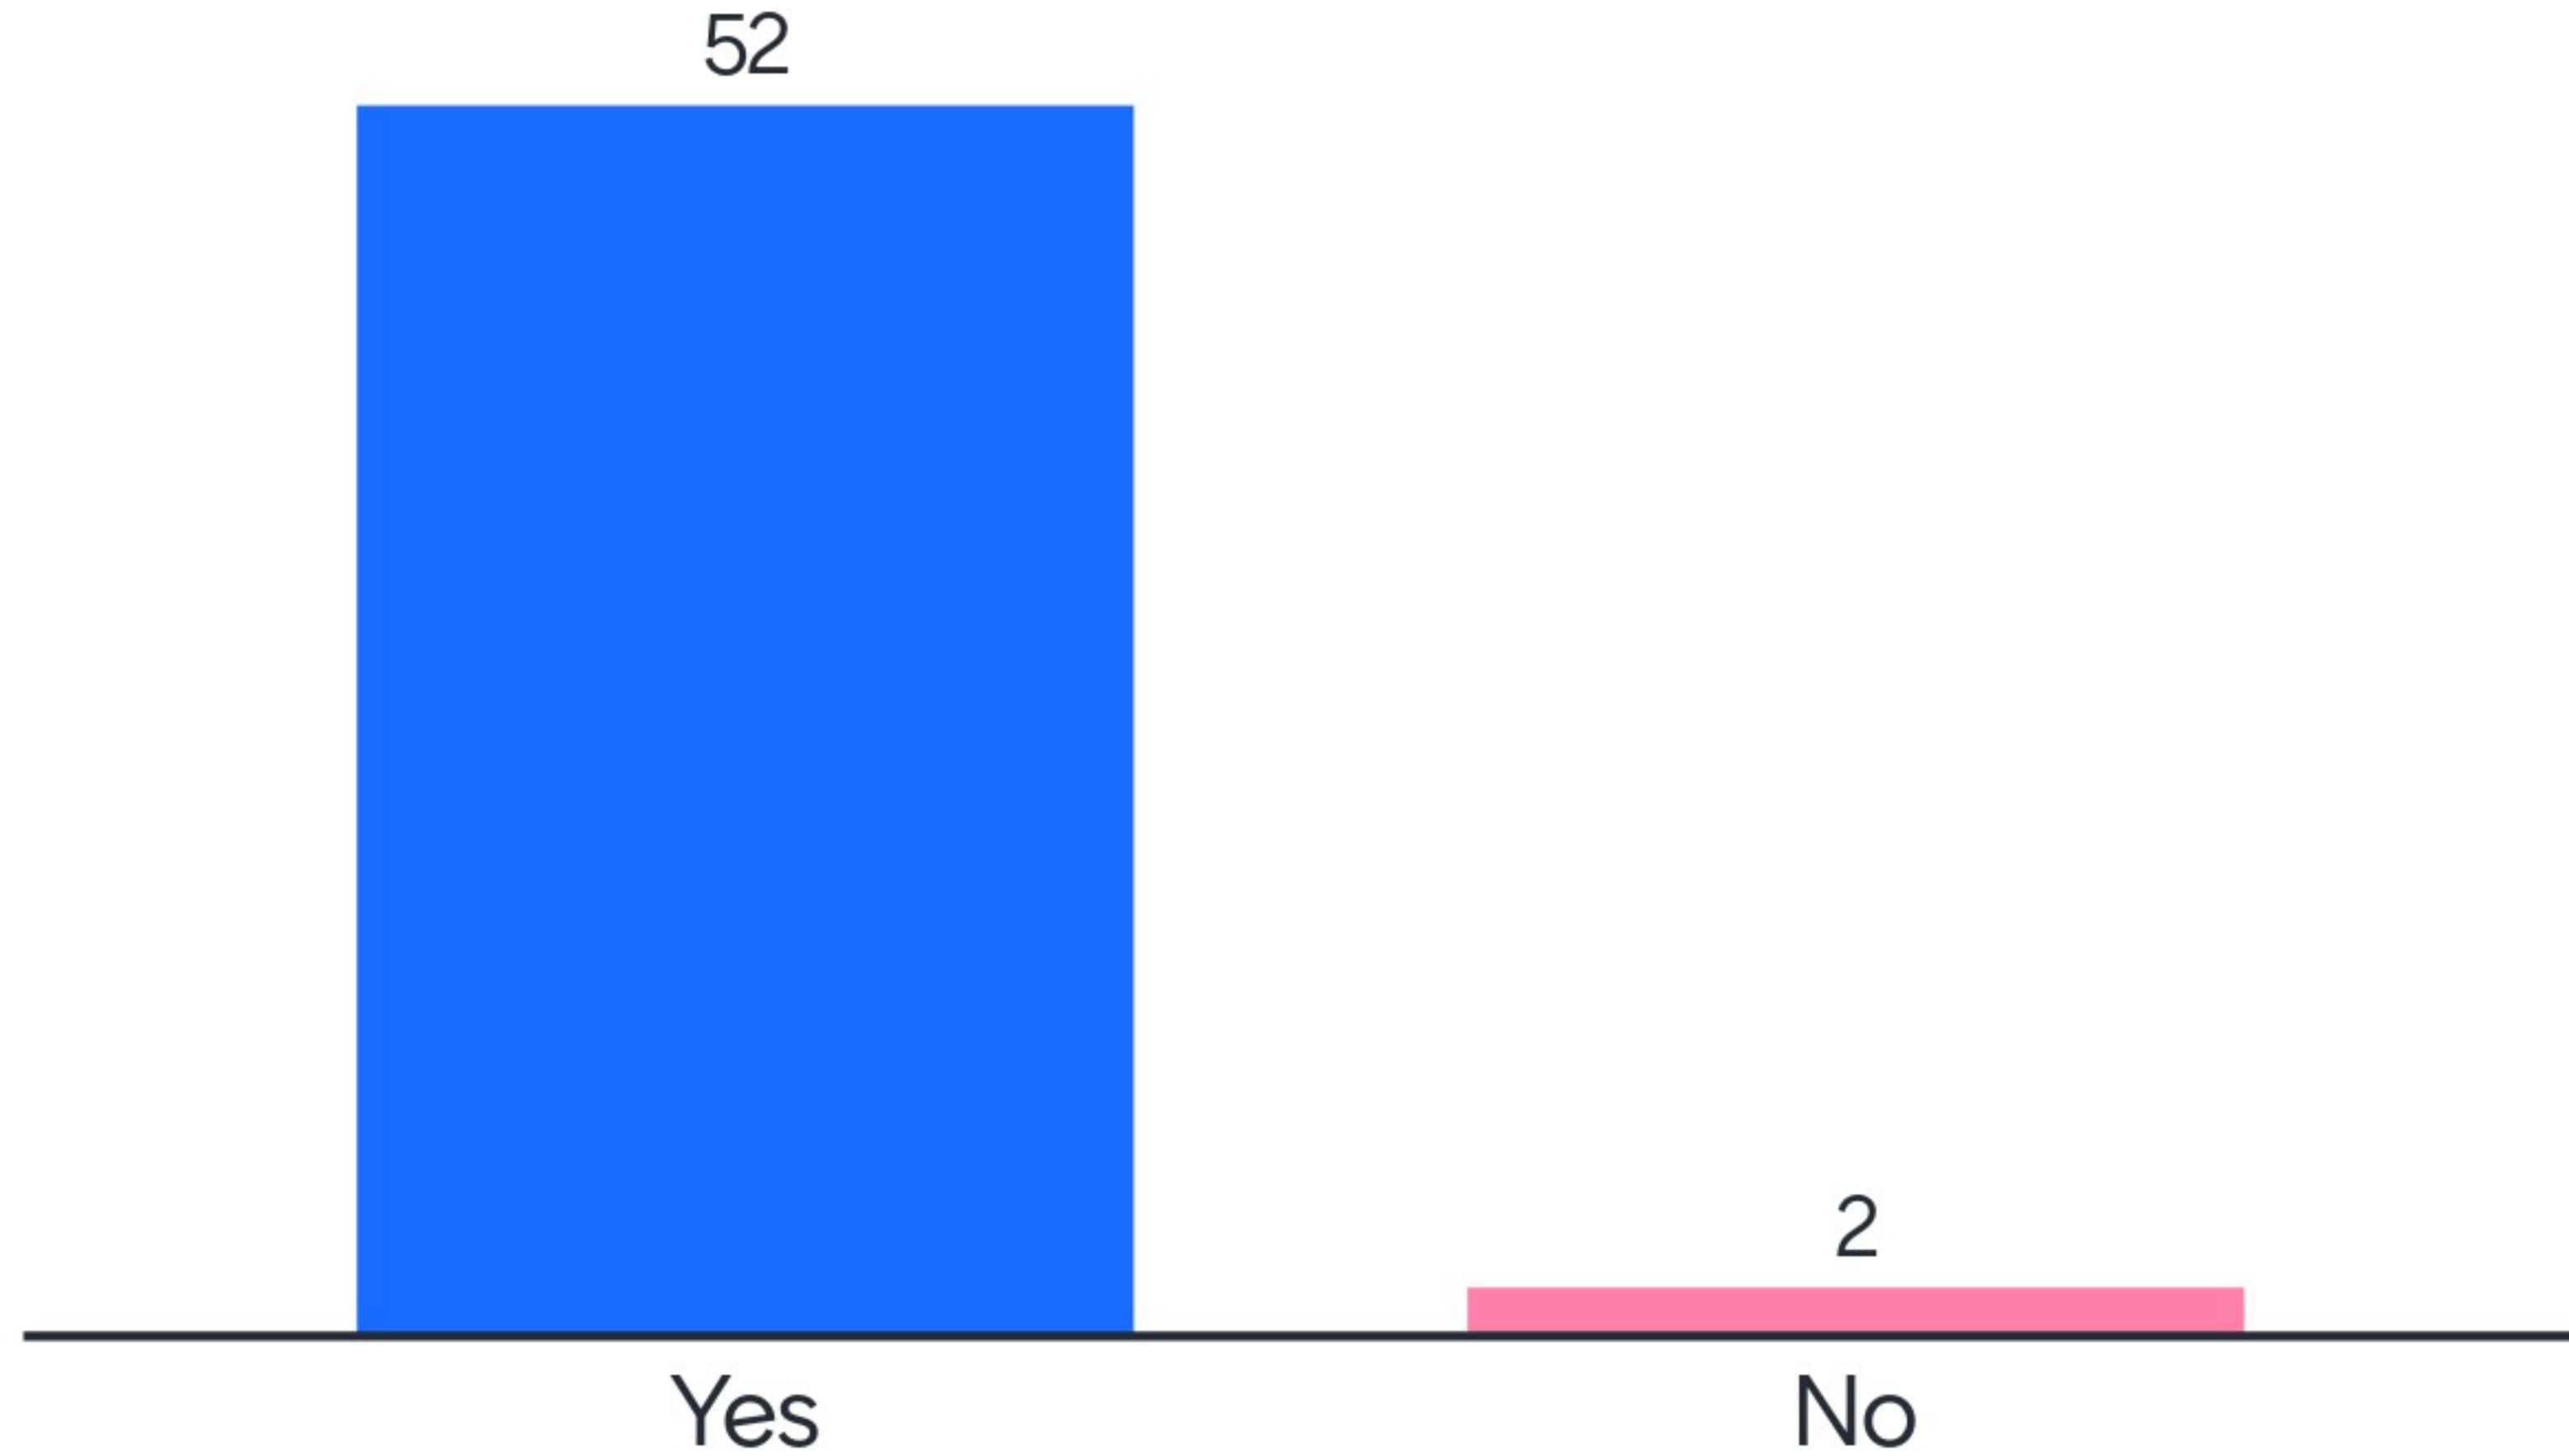

Are there other aspects we should include in future revisions of our Strategy?

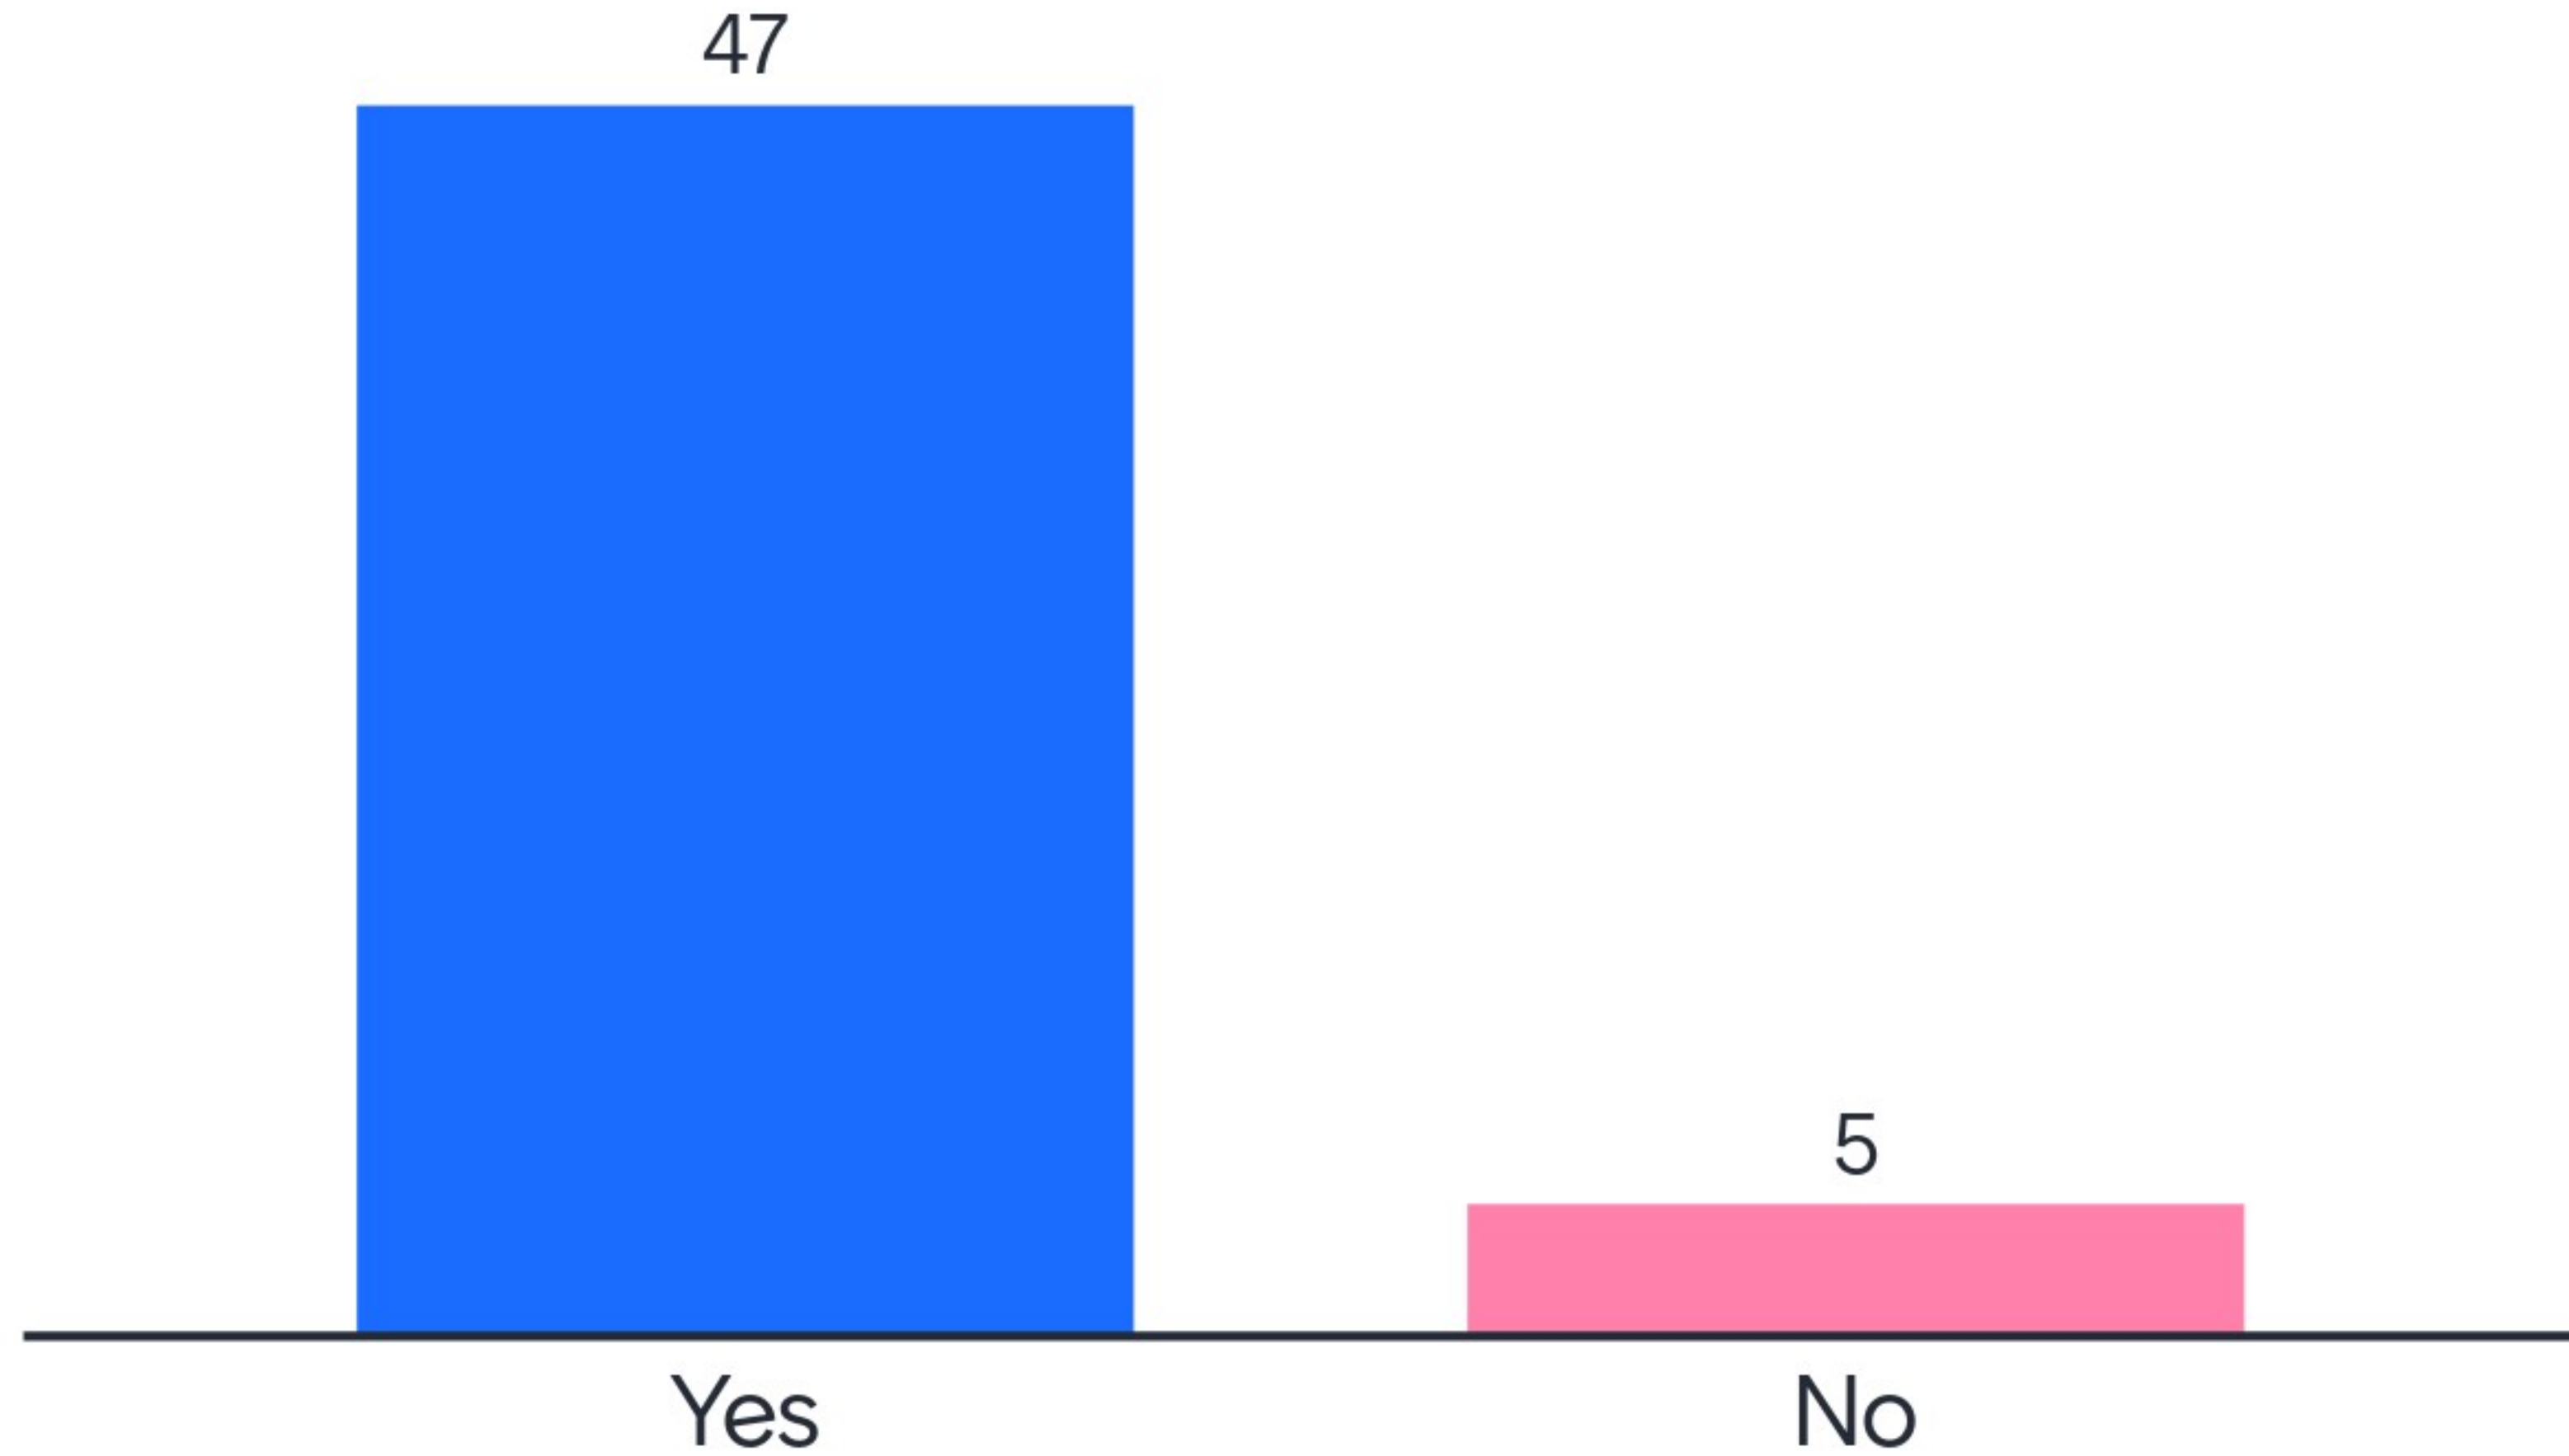

Do you consider digital to be critical to the future transformation of health and care in our region ?

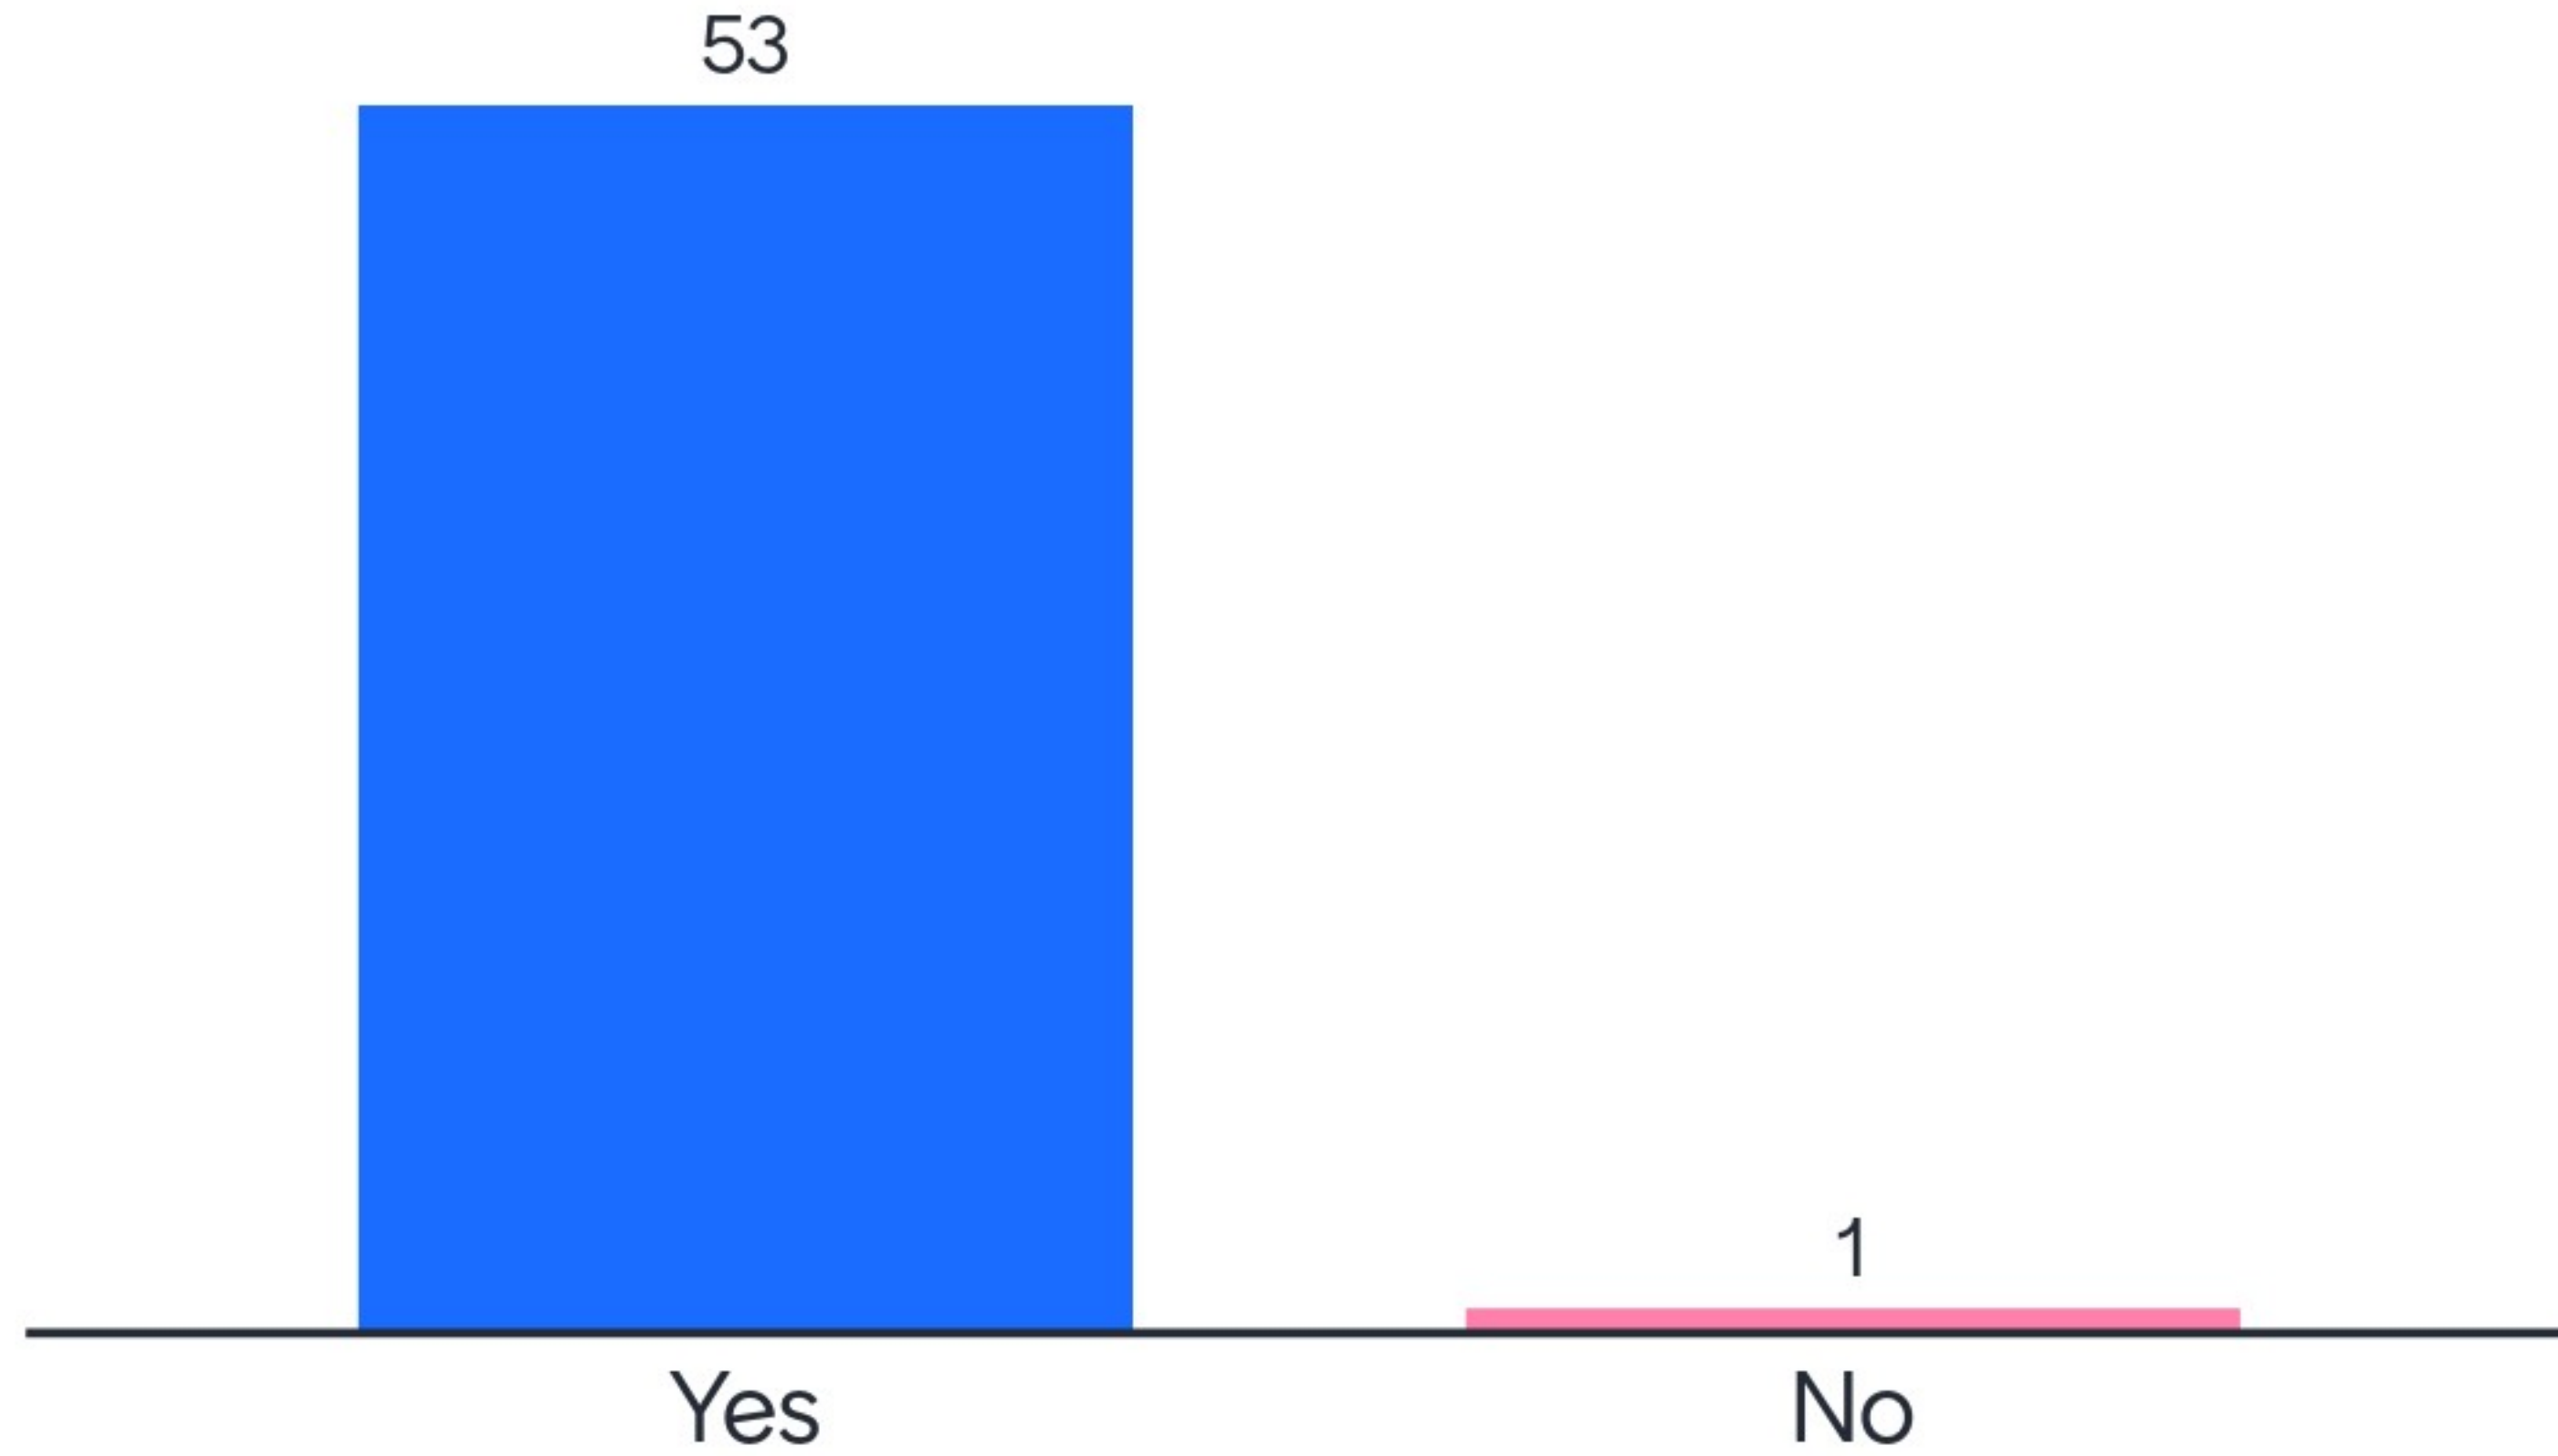

Do you agree with our strategic approach?

Have we captured the key strategic themes?

Does our strategic animation describe our ambition in an understandable way?

Have you ideas for the next stages for the Great North Care Record?

Do you have any ideas or feedback to help us support all who live and work in the region?

patient tutorials

Discourse forum

Encourage/support all social care depts and independent social care providers to be part of GNCR, but funding and resources will be needed to assist with this - some providers are relatively small with little digital expertise.

Do an assessment on how many people don't have digital connectivity or capability, and then weigh up the costs and benefits of selectively supplying devices.

Interoperability between IT systems to allow patient data flow between health and social care.

It would be great if we could pull primary care medication information and use this in secondary care (either via HIE or another GNCR tool). At the point of discharge we could also offer medication changes to be accepted by the primary care team.

Connected systems

What are you most likely to use Axiom and/or TREE for (provide specific examples where possible)?

evidence of benefits realisation

Benefits

Support commissioning decisions

Benefits analysis

What, if any, barriers and concerns do you have with Axiom and/or TREE?

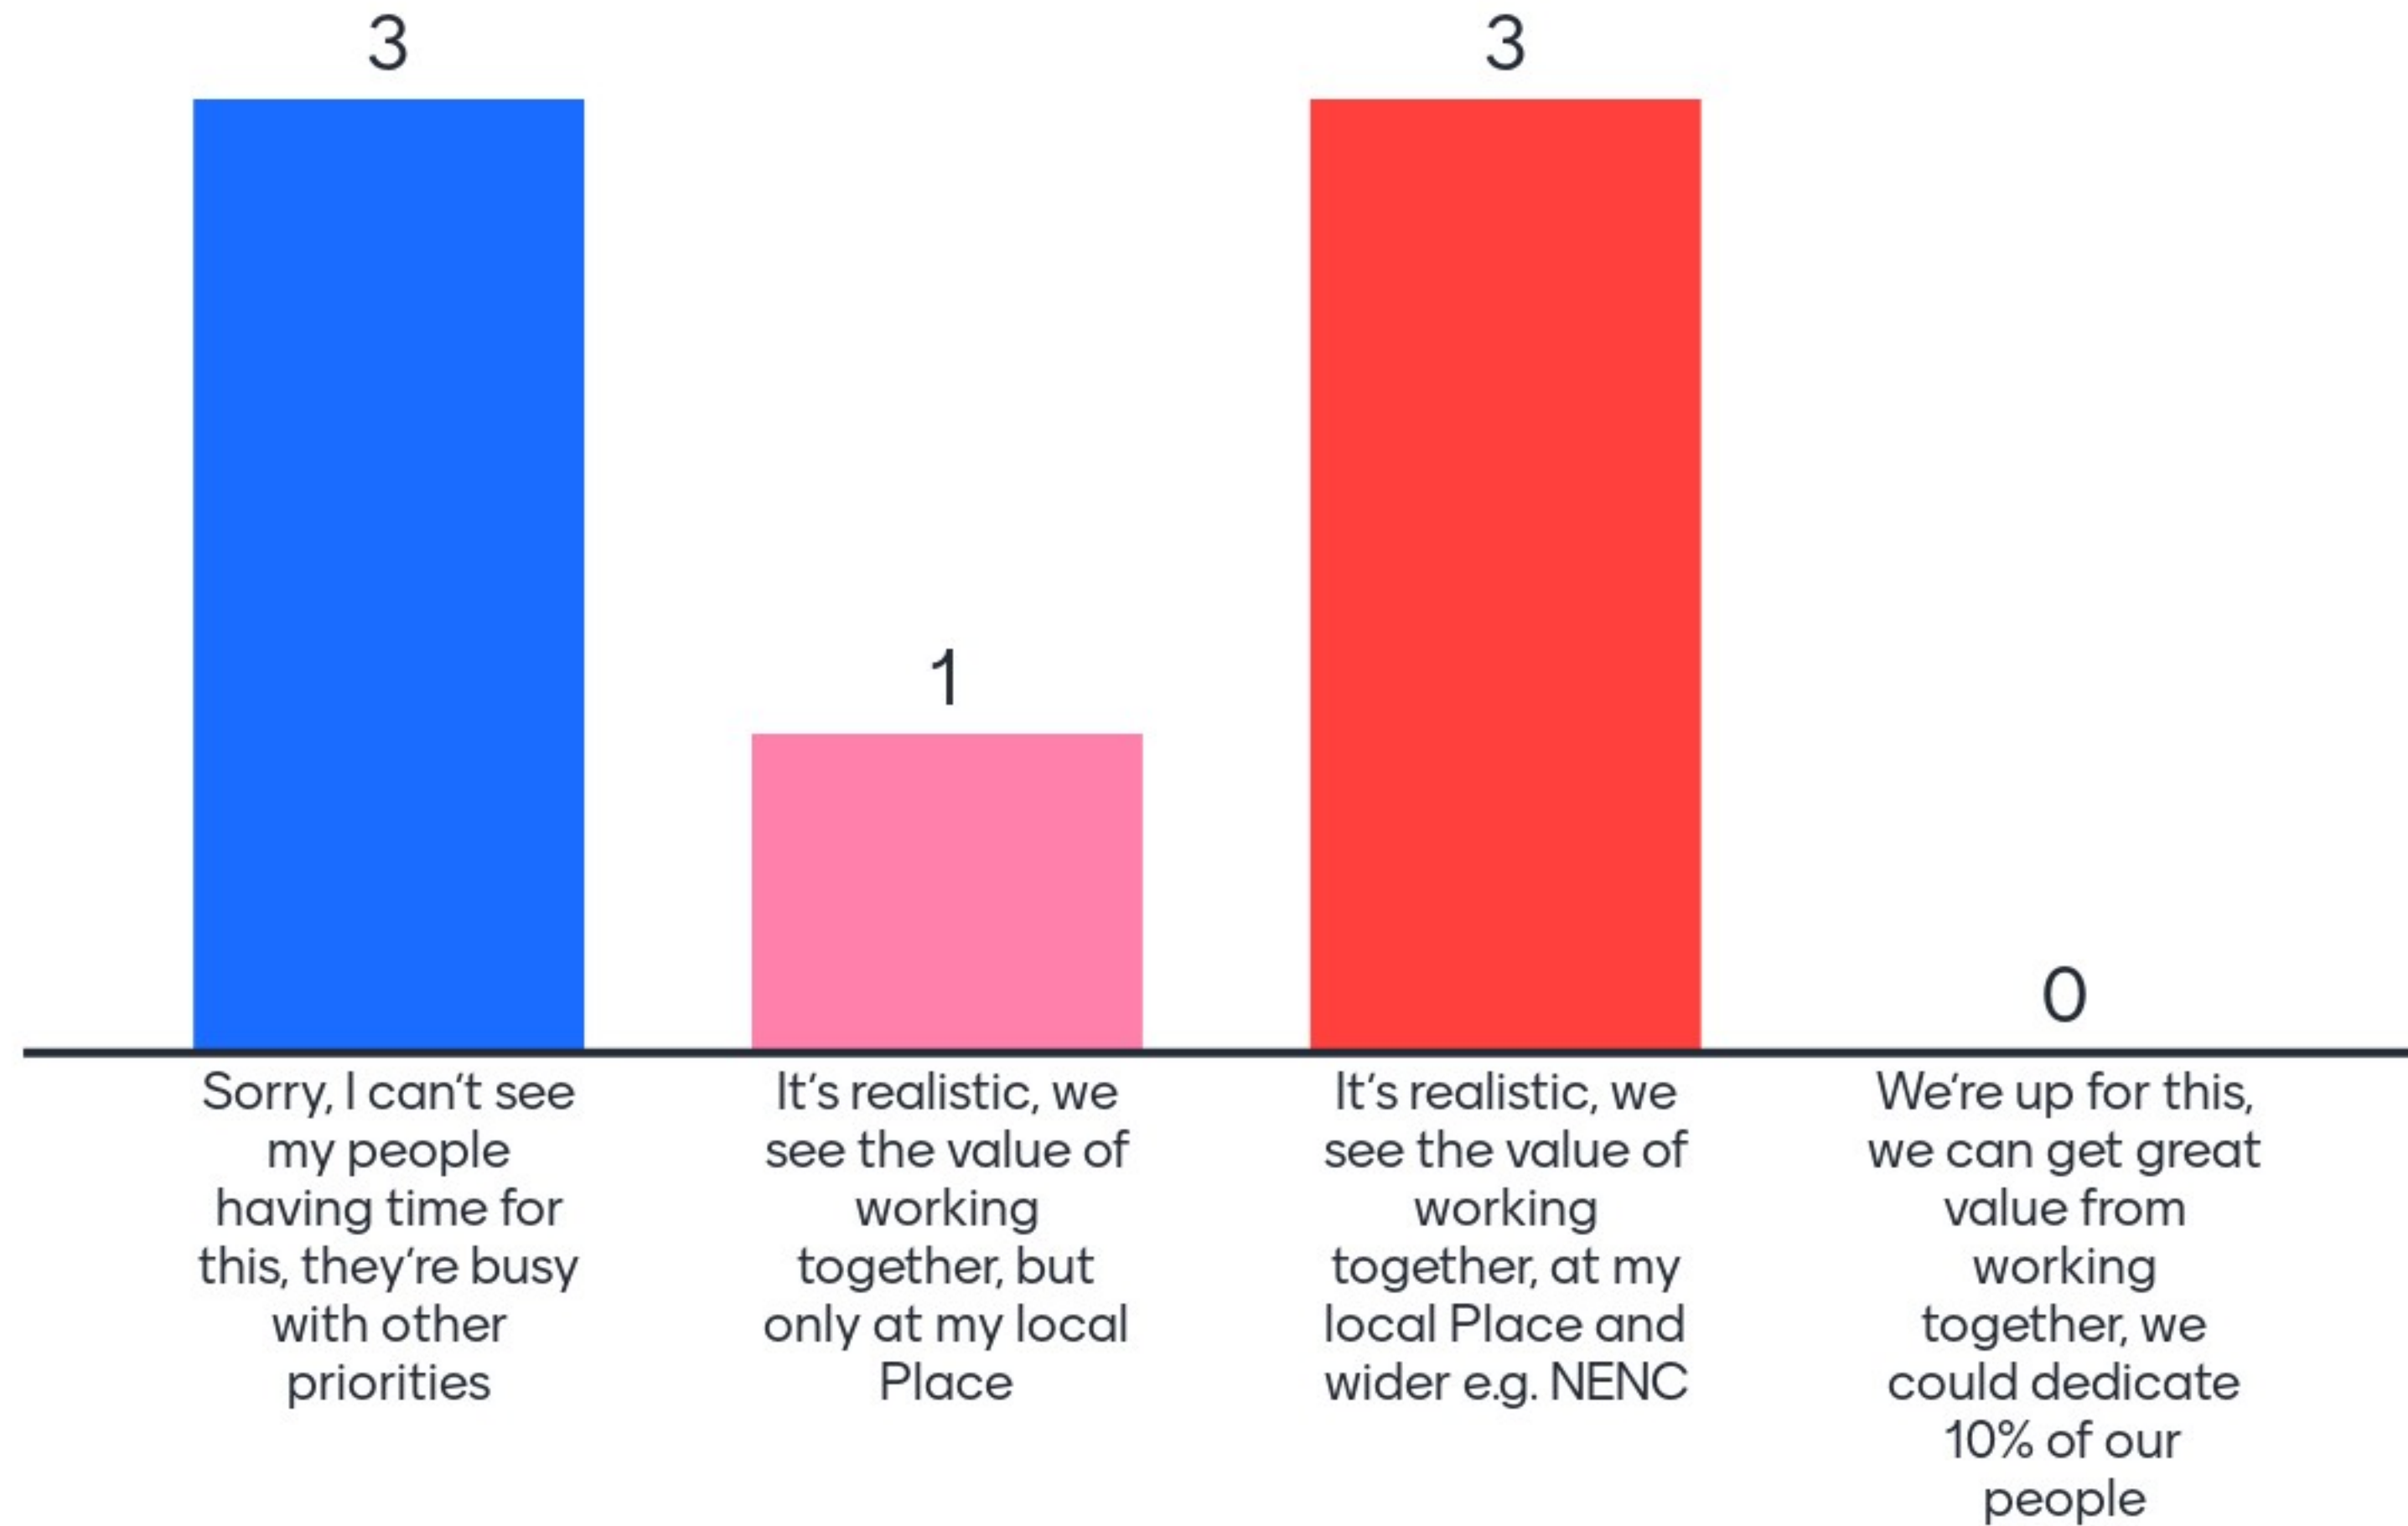

Ensuring the data controls are in place to support trust in the population

Not applicable

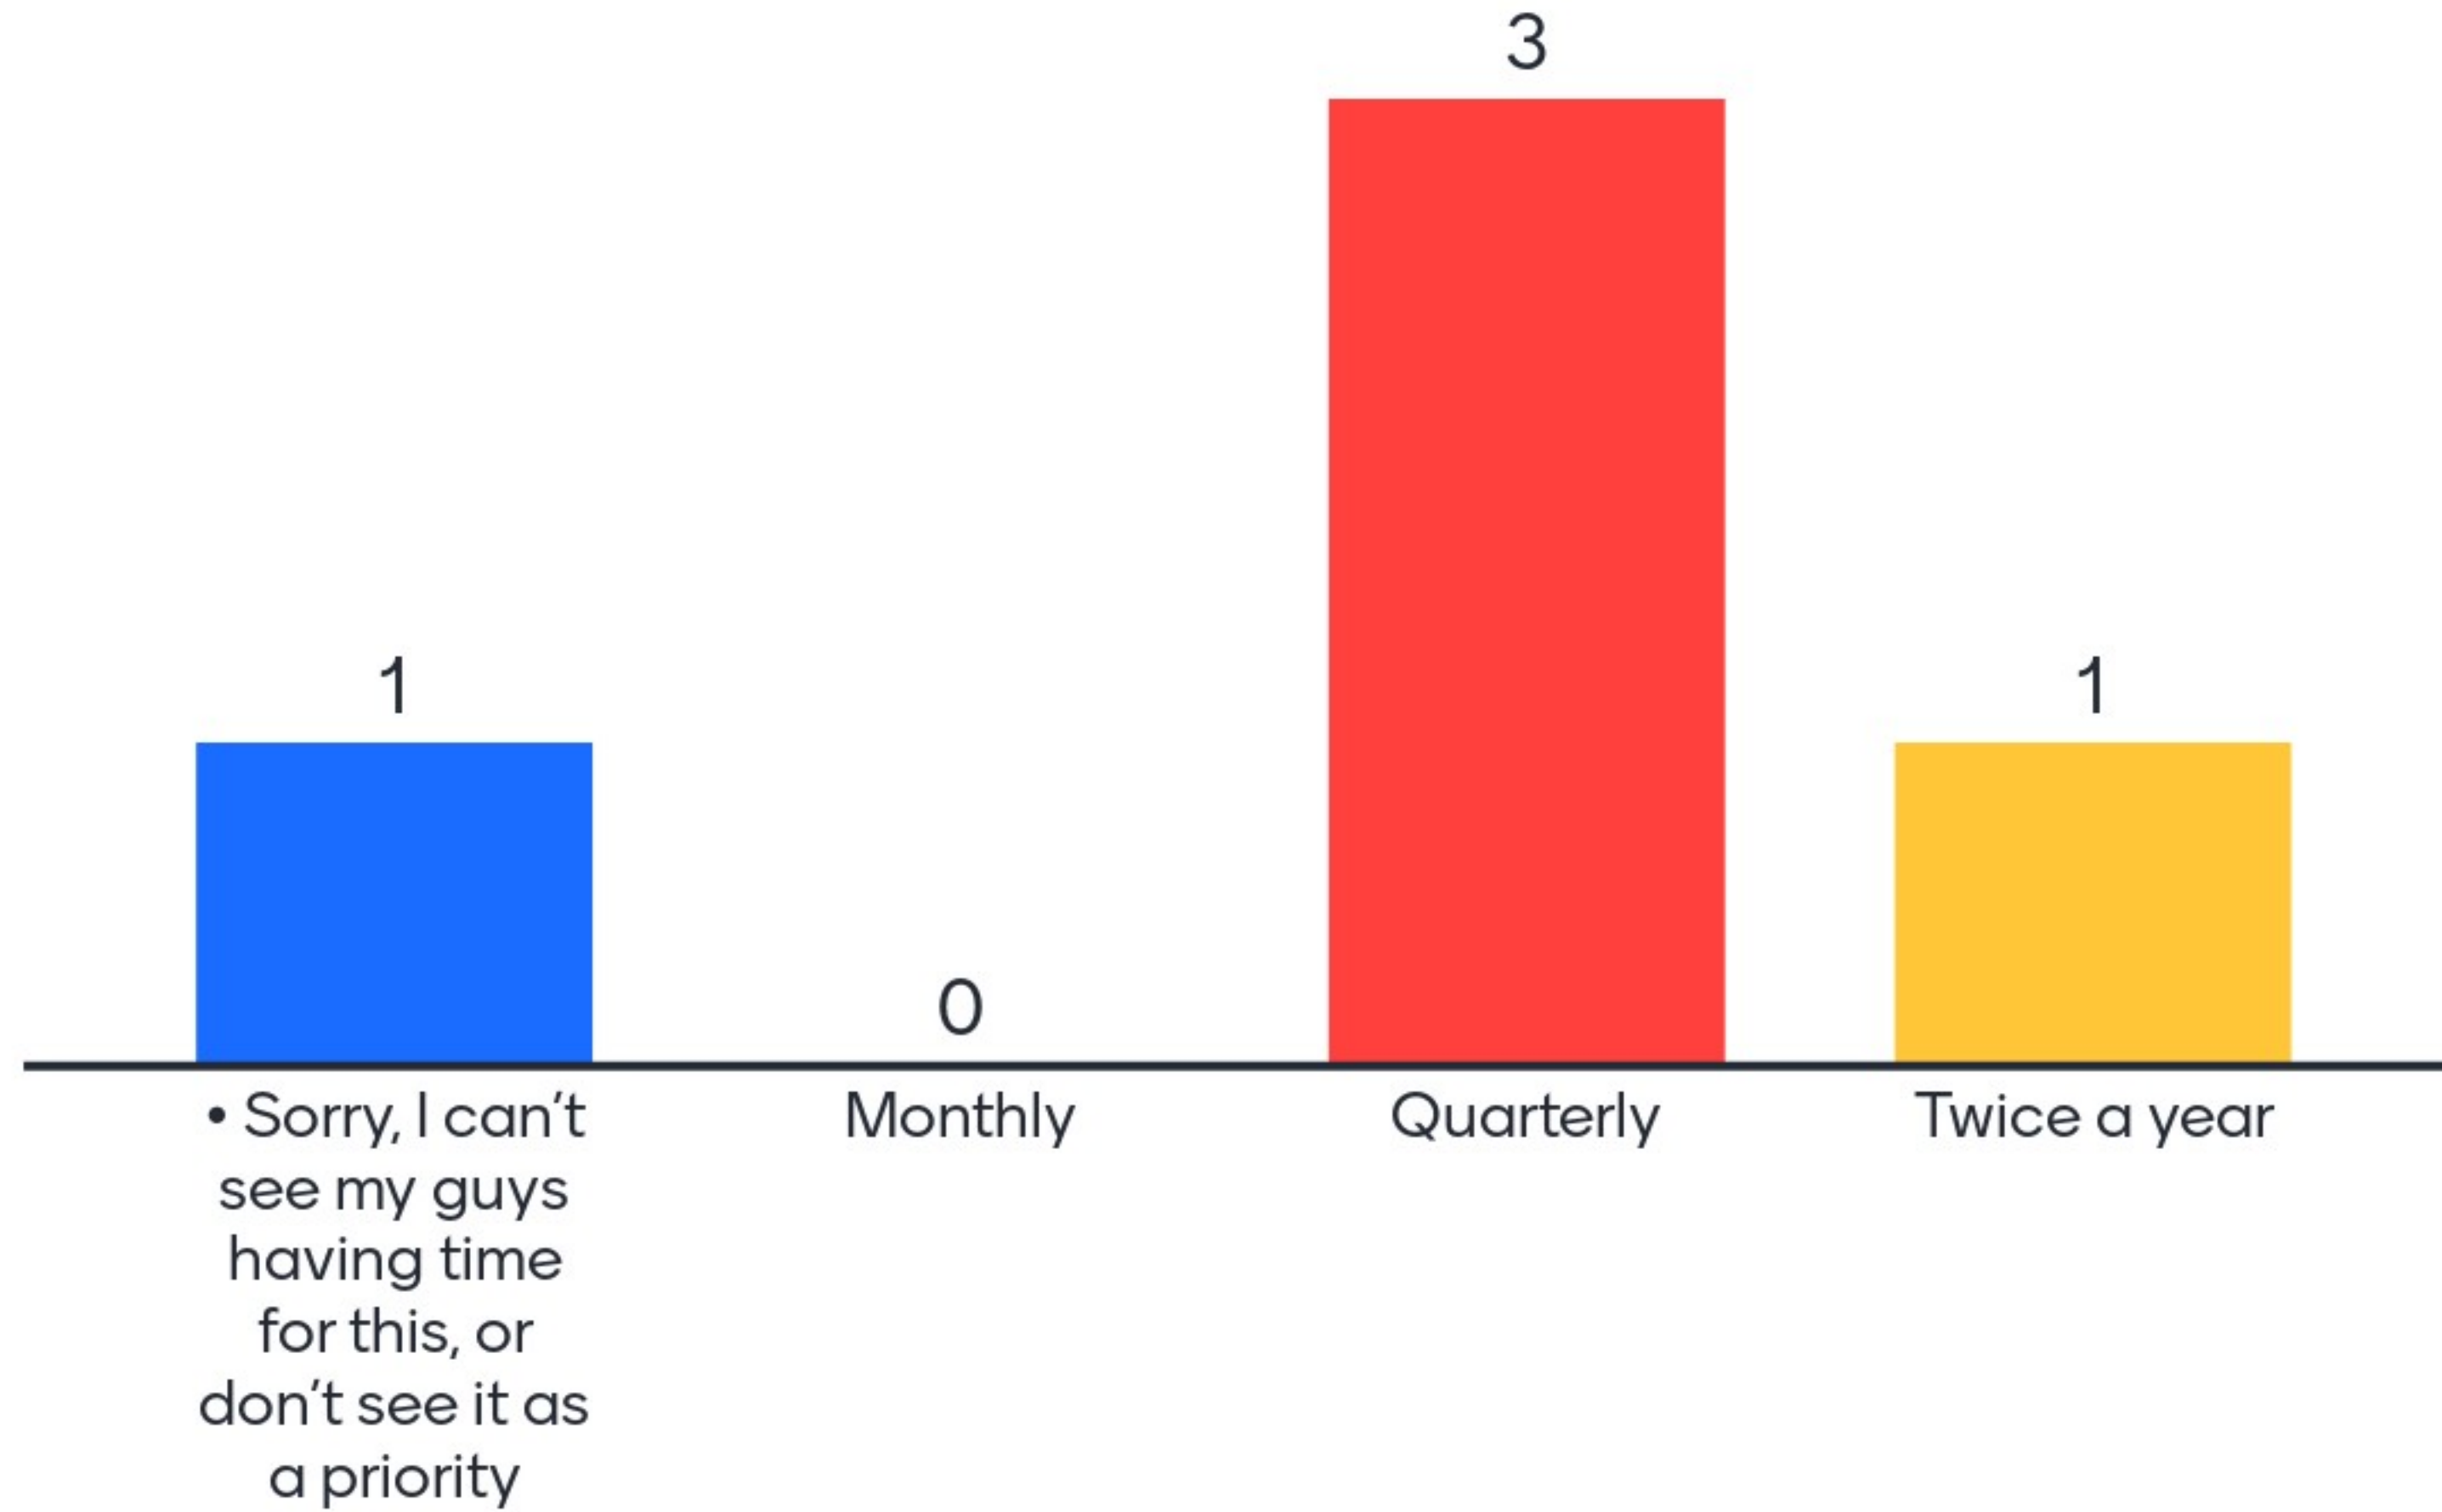

Ensuring it links in with NHSD public health platform.

Would need to know more - how can I disseminate/engage other clinicians from my specialty in this work?

How realistic is it for Analysts from your org to work with other orgs in an integrated manner in support of PHM ?

How often would you support Analysts coming together in a Network for sharing / learning / mutual support etc.?

What are your suggestions for Next Steps for developing our PHM Analytics capability?

To consider linking in with the emerging Anticipatory Care agenda, aiding with patient cohort identification.

Do you have any feedback?

New to NHS so summit really informative

No discussion around the future of NECS and it's teams following the strategy. Great sharing good practice

Great update on the fantastic progress being made

Helpful insights and overview of digital progress across the region, thank you.

Good sessions, many thanks. As an ICS we need to enable better information sharing via APIs from GNCR.

Critical to ensure proper organizational ownership of the strategy and understand and agree to the impact on their organization

Interesting conversations and a breadth of expertise - thank you. A lack of feeling as to where to go from here though and how to act based on the ideas presented though

Very positive session and great that so many attended

Great session, how do we find out more about GNCR and Health Call

Do you have any feedback?

Very informative summit, digital exclusion/inclusion key area to be addressed, thank you.

Teams (when it's working) is great and has its benefits, but I feel the benefits of face to face are greater.

Great summit, really informative

Excellent Event!

Really found today interesting.

Really interesting

Discourse forum vote from us

Enjoyed the ability to drop in and out and still perform work tasks alongside

Great day, really informative

To help us plan for the future, what did you get out of the Digital Summit today?

Feeling more connected to the regional strategy and work

Great overview of all the work going on

Lots of new info and contacts

A broad overview of what is happening.

Would you like this to be face to face or virtual in future?
